Art Unit: 1771

1. Claims 22-32 are cancelled without traverse in Paper No. 7.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-21 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hurley et al (US 5,938,878) substantially as set forth in Paper No. 6.

***Response to Arguments***

5. The art rejections over D'Luzansky have been overcome by the present response.
6. Applicant's arguments filed 10/11/01 have been fully considered but they are not persuasive.

The argument that Hurley does not teach or suggest the coating and the resultant composite structure that have all the limitations as set forth in the claims is not persuasive. At the first place, Hurley teaches a laminate having a core material 4 bonded to first foam layer 6 on one surface and to a second foam layer 8 on the

second surface (figure 2). The core material of Hurley is analogous to a coating as claimed by the present application. Secondly, Hurley goes on and discloses the core (as the claimed coating) comprising ethylene-propylene rubber (column 9, line 25) which is one of members required by the claims. Further, the argument that Hurley does not teach the coating but rather uses heat or adhesive lamination is not persuasive because of the following reasons. It's the examiner's position that the article of Hurley is identical to or only slightly different that the claimed article prepared by the method of the claim, because both articles use the same materials, having structural similarity (a coating disposed between two different foam layers). Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or an obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985). The burden has been shifted to the applicant to show unobvious differences between the claimed product and the prior art product. *In re Marosi*, 218 USPQ 289,291 (Fed. Cir. 1983). The Hurley reference either anticipated or strongly suggested the claimed subject matter. It is noted that if the applicant intends to rely on Examples in the specification or in a submitted Declaration to show non-obviousness, the applicant should clearly state how the Examples of the present invention are commensurate in scope with the claims and how the Comparative Examples are commensurate in scope with Hurley.

The Examiner agrees that Hurley is silent as to a bond strength of the laminate. However, since the laminate of Hurley is structurally the same, and made of the same materials as the presently claimed composite. It is the examiner's position that the laminated structure of Hurley exhibits substantially identical properties as the composite structure of present application. Hurley is either anticipated or strongly suggested the claimed subject matter. Note In re Best 195 USPQ at 433, footnote 4 (CCPA 1977) as to the providing of this rejection under 35 USC 103 in addition to the rejection made under 35 USC 102.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
